In April, 1895, a remarkable fall of snow, the color of which might easily justify the description, "bloody snow," but was believed, on examination, to be due to the presence of volcaric dust, was witnessed in Winfield, Col., and described by F. T. Symens, of that town, to Dr. J. P. Hale, of Colorade, who in his turn communicated it to the newspapers.

At another time a curious shower of dust fell during a storm round about Laporte county Ind., and was also duly reported in the press. It turned out that the dust consisted largely of silt, mixed organic matter, fibers of grass, shreds of woody tissue and myriads of microscopic animalculae.

Horseshoe Superstition.

Wonder—The superstition concerning the horseshoe, like practically all other superstitions, had its origin too far into antiquity to be traced with any definiteness, though it would seem to be at least probable that the belief that good luck is attached to the finding of a horseshoe or to the possession of one, is a survival of the early belief that it was a protection against witches. It is told that for this reason a horseshoe was at one time nailed over nearly every door in London. There is also a legend concerning St. Dunstan, which is much more probably the outgrowth of the superstition rather than the superstition being the outgrowth of the gend. The devil, it is related, one day asked St. Dunstan, who was noted for his skill in shoeing horses, to shoe his single hoof, and Dunstan, knowing who his customer was, tied bim to the wall and purposely put him to so much pain that the devil roared for mercy.
